                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Clone distribution: MGC clone distribution information can be found through the I.M.A.G.B. Consortium/LiNL at: http://image.llnl.gov beries: TRAL Plate: 21 Row. h Column: 12

This clone was selected for full length sequencing because it passed the following selection criteria: Similarity but not identity to protein

This clone has the following problem: The cds is short compared to the longest cds in the locus.
                                              Bukaryota, Metazoa, Chordata, Craniata, Vertebrata, Buteleostomi,

This clone was selected for full length sequencing because it
passed the following selection criteria: matched mRNA gi: 5902015
This clone has the following problem: The cds is short compared to
the longest cds in the locus.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             NOGO, ASY, NI220/250, NSP, RTN-X"

Consortium/LLNL at: http://image.llnl.gov Series: IRAK Plate: 21 Row: h Column: 13
This clone was selected for full length sequencing because it passed the following selection criteria: Hexamer frequency ORF analysis, Similarity but not identity to protein
This clone has the following problem: The cds is short compared the longest cds in the locus.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Direct Submission

                                                                         Clone distribution: MGC clone distribution information can be found through the I.M.A.G.E. Consortium/LLNL at: http://image.llnl.gov Series: IRAL Plate: 54 Row: c Column: 22
This clone was selected for full length sequencing because it passed the following selection criteria: matched mRNA gi: 28557782
This clone has the following problem: The cds is short compared to the longest cds in the locus.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  924 TTGGCCCTGCTCTCTGTGACCATCAGCTTTAGGATATACAAGGGTGTGATCCAAGCTATC 983
